

FIELD SCOUTING REPORT

Grower:	Scout:	Date:
Farm:	Field:	Crop:

Row width: _____

Crop stage & height: _____

Plants per acre: Report each survey stop and calculate field average

											Average:
--	--	--	--	--	--	--	--	--	--	--	----------

Indicate whether weed pressure is none (N), very low (VL), low (L), moderate (M), intermediate (I), high (H) or very high (VH)

Weeds	Pressure	Average Height	Max Height	Notes

Insects	Number of pests or % damage at each survey stop										Average	Note insect size/stage if applicable

Disease	% infection at each survey stop										Average	Note location of disease on plant (lower, middle, upper)

Notable field conditions & other observations:
(Abiotic stresses, mechanical problems, etc.)

Draw field map & specific areas of interest:
